

Notes from Hades

This column is generally the last thing that I write before I complete and issue, and in this particular case, it is something of an oddity. That is because I am writing this on the day after the deadline. A number of factors contributed to this. While not all of you got your orders in on time (you know who you are!), everybody got their orders in no later than a day late. That, combined with the fact that I got half a day off today, meant that I was able to complete all of the games today – a rare and wondrous thing. So, enjoy the fact that you have an extra long time to negotiate with each other and get your orders in. But, don't get too complacent and get them to me late. I would like to have occasions like this to be a bit less rare.

Nobody objected to Dogwood becoming a 7-player game, so there it is. It starts this issue. I will keep the current number of games going, so the next time a game ends, Salty Dog will be ready to start. The order in which the games are listed below is the order in which they will start.

The next deadline is **Tuesday, November 9 at 5:00 p.m.**

Pacific Time. Please note that games that are run by guest GMs or in a subzine could be on a different schedule, so look at the games themselves. **Please do not call or fax orders after 10:00 p.m. Pacific time.** My wife and I tend to retire early. Also, if you want to fax in orders, call first. We hang up on unannounced faxes.

Florence – Naples: What the hell is a thron? Anyway, I don't know why you blame me for your continued attacks on me. Right now, you still have Pio and I have Tunis, and you are threatening Rome. If you would simply agree to stop attacking me, I would give you back Tunis.

France – Florence: Dear friend, you had bad days with plague. Now we shall see if Venice maintain his promises to you.

France – Naples: It seems that plague is with you, but as I said if you agreed for islands division, I shall not enter in your questions.

France – Venice: I probably have few ducats, but you certainly have as many ducats need to buy two armies of anyone of us.

Naples – Florence: So sorry for the West Nile Plague that hit you in Pisa & Perugia, even tho you deserved it!

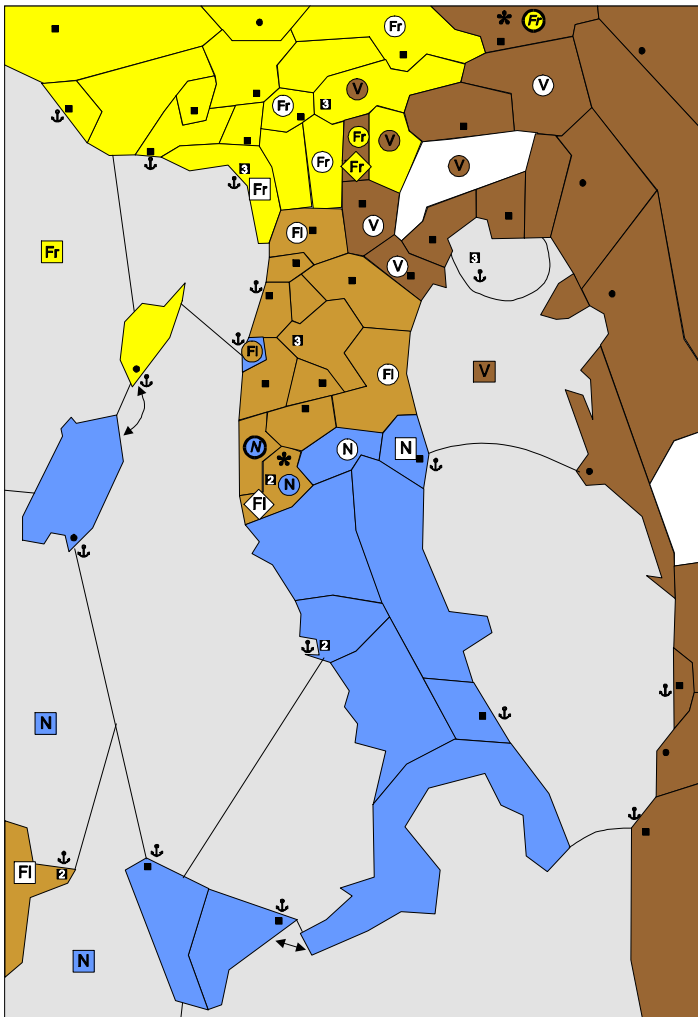

Naples – France: Way to go, bro!

Naples – Venice: Your moves seen and applauded. We will maintain the truce.

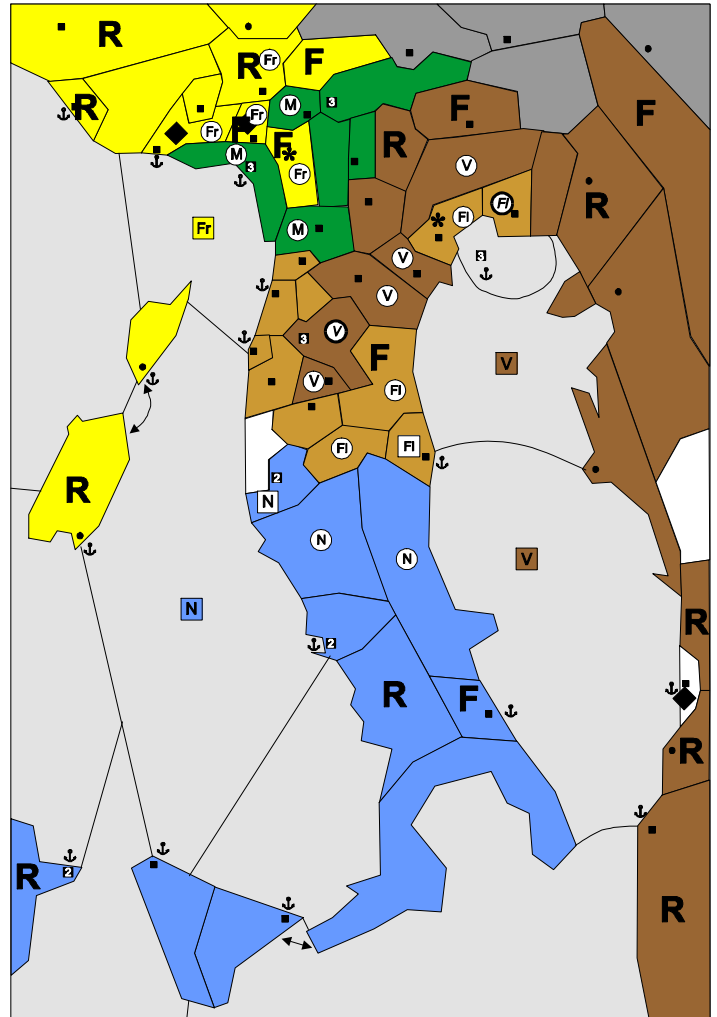

Venice – France: If you predicted my move and countered it you will have won the game. If not, the rest of us stand a chance.

The Players

DWARVES: Phil Reynolds
 ELVES: Steve Koehler
 GANDALF: Paul Bolduc
 GONDOR: Andy York

MORDOR: Dave Anderson (resigned, 3019-5-II), Dave Partridge
 ROHAN: Bill Scharf
 SARUMAN: Bob Robles
 UMBAR: Cary Nichols

Dave Anderson (Original Mordor): Congratulations to Dave Partridge on his stunning come from behind victory. I knew with the mindset, I had at the time I turned over the reigns to him, I wouldn't have pulled out the victory. I was unable to converse with Cary Nichols [Umbar] all game. I give credit to the other players to getting him to go to the West. I always have a good time playing against Paul Bolduc and the others. But, I got too distracted from the game by other events and other games to put any effective leadership and by the time I gave it up. It looked hopeless. So, it just shows Dave Partridges resilience and skill that Mordor was able to pull it out. The only thing I will give myself credit for is moving the Nazgul to the far north in my final couple of moves searching for the RING. I would like to try again. Someday. The wearer of the Ring.... beware who bears the RING...

Andy York (Gondor): Wow, never saw that coming, I thought the Good Guys were doing a decent job. Then, out of the blue..... Great job David!!

Cary Nichols (Umbar): As I said not long ago – Congrats (again), Dave!

Paul Bolduc (Gandalf): Gandalf to the Good Guys: My fault. I found the Ring fairly early, but, after a narrow and still inexplicable escape from an army of orcs, got too aggressive (or maybe impatient is a better word). Should've hired at least a single Elf Army escort. Then again, Elrond wasn't telling me squat.

Bill Scharf (Rohan): I'm still not sure about this variant. If the neutrals go evil then evil wins....if they go good then good wins. The only variation is that if good is overconfident or desperate they can lose the ring to Mordor. Otherwise its military action all the way until one side is too beat down to resist. Its Lord of the Rings so I like playing it (and thanks for running it Chris) but I usually feel something is missing....h'mm maybe an evil northern goblin player....and have a common good win possible but only a single evil player can win....have Saruman evil to start out with...have Mordor be strong but not overpowering....urk lets stop this now....or I'll be free-associating game ideas all night....and nobody wants that.

Phil Reynolds (Dwarves): I was shocked that the game ended as it did. Clearly, the turning point was when the Elves moved the two personality units with the Ring -- but without an army -- to a space occupied by a Mordor army, which killed the personality units, took the Ring and gave it to the Nazgul, which in turn took it back to Sauron.

I was also surprised by how little discussion and coordination of orders there was among the Good players. I've played this Downfall variant only once -- I'm used to playing Hardbop. As the Elves in the last game I was in, I was in contact with all the Good players after each adjudication, swapping news of areas searched for the Ring, coordinating attacks against our enemies, etc. We won the game pretty easily. But in "Warg," I felt like I was on my own most of the time. Sometimes the Elves would order as I asked, sometimes not. I think if we had run our orders by each other every turn, we could have avoided the disastrous event that occurred.

Congrats to Dave P. for picking up where Dave A. left Mordor and winning. By the way, once I saw that Dave A. was playing Mordor, I knew I had to turn Good, because not once have I ever been able to work out an alliance with Dave A. in about 10 games that we've played together. Too bad -- I otherwise would have liked to join the Evil One and fight the Elves, since it seems like the Dwarves are always allied with the Elves!

Bob Robles (Saruman): A very enjoyable variant. Never played it before but at least I made it to the end. Congratulations to Sauron for his hard fought victory.

Steve Koehler (Elves): Well, congrats to David. Well played. Very frustrating for a game to end because one player made a mistake and ended up giving the Ring to Sauron. Unlike Diplomacy, where one player cannot lose the game for all, Necro seems to allow it. I am not clear on what exactly happened. The player with the Ring was not very clear about it.

I wrote to Nichols a couple of times but he NEVER communicated with me. Very frustrating, since we each had three useless units fighting each other the entire game. I hope he will explain why he attacked me near the Gray Havens.

Phil made a valiant effort to organize the good players, and I enjoyed working with him.

Bob played a tough Saruman and I enjoyed battling with him.

Dave Partridge (Mordor): I came into the game as a standby and as was to be expected, everyone but Saruman was against me. Militarily it didn't look like I could hold on so the only real chance I saw was to try and get Umbar to switch to my side. I tried as hard as I could diplomatically but was getting nowhere. My only real argument was that Umbar wasn't going to be part of the win on the good side, either they'd win as a group or the Elves would solo. I did everything I could to make the threat of the Elvish solo more prominent, which is why I concentrated my forces against the Dwarves.

I wish I could claim credit for the winning strategy, but it was really just luck that Gandalf crossed paths with my army. I had ordered that he be killed if encountered, but that's all the credit I can claim. After that it was just a race to get the ring back and put it on without letting the goodfellows take it back or kill Sauron.

Thanks to everyone for the game and to Chris for running it. Once again it confirmed that I'm not really a fan of the game. It's fun tactically, but there's too little room for diplomacy and too much luck.

Globular clusters are some of the most beautiful and intriguing objects in our sky. They contain millions of stars, all crammed into the space that typically holds one star in our neighborhood. These dense conglomerations of stars are thought to be some of the oldest structures in the universe, and to contain the oldest stars. So old, in fact, that they were used to set a lower limit on the age of the universe. Recent evidence, however, has challenged the claim that all globular clusters formed early in the universe, and that no new ones have been produced in more recent times.

The ages of globular clusters are relatively easy to determine. Since all of the stars in such a cluster form at nearly the same time, you can plot the stars on a Hertzsprung-Russell diagram. The point at which the stars start to leave the main sequence tells you the most massive stars that have exhausted the hydrogen in their cores. Using standard stellar evolution models, we can then determine the mass that such stars would have and therefore the age of the cluster. Nearly all clusters are very old, including all of the globular clusters in our own galaxy, but recently, using such advanced telescopes as the Hubble Space Telescope, some surprising youngsters have been found.

The newly discovered young globular clusters all have something in common – they were found in galaxies that have undergone some sort of close interaction with another galaxy recently. Galactic collisions are extremely

complex events, but by and large, individual stars are not directly affected by them. Gas clouds, however, are profoundly affected. Whereas stars will pass by each other with just some gravitational perturbation, gas clouds collide. This increases the density and temperature within the clouds and triggers the process of star formation. If the cloud is large enough and dense enough, a globular cluster can result.

One way of verifying this theory is to look at large elliptical galaxies. Ellipticals are thought to be the result of the merger of two or more spiral galaxies. If this is true, we should be able to find evidence of middle-aged globular clusters around elliptical galaxies, that date from the time of the merger. In fact we do find this to be the case. The large elliptical galaxy NGC 4365 has large numbers of old and middle-aged globular clusters.

Astronomers have also looked at currently merging galaxies like the Antennae (NGC 4038/4039) and found brand new globular clusters, both newly formed and in the process of forming. By closely examining the old, middle-aged, and young globular clusters, they have been able to determine that they are in fact different stages of the same type of structure, and not different structures entirely.

Next issue, I will talk about some theories of what happened to the Earth when it was hit by the large meteorite that ended the age of the dinosaurs.
